Department of Sciences

Module: Foreign Language 1

Session 3: Futur Tense, Active and Passive Voices, Conditionals Types

Future Tense

The future tense is used to describe actions or events that will happen later. There are three main ways to express the future in English.

1. Future Simple (Will)

Structure: Subject + will + base verb

Use: To express predictions, instant decisions, promises, or offers.

Structure Forms:

- affirmative: Subject + will + base verb (e.g., I will calculate.)
- Negative: Subject + will not (won't) + base verb (e.g., I won't solve.)
- Question: Will + subject + base verb + ? (e.g., Will you study Python?)

Examples:

- Technical: Computers will replace manual calculations in the future.
- Decision: I think I will install this software now.
- Promise: I will help you with your presentation.

2. To Be Going To

Structure: Subject + am/is/are + going to + base verb

Use: To talk about planned actions or predictions based on current evidence.

Examples:

- Plan: I am going to design a new algorithm.
- Prediction: Look at this chart! The value is going to increase rapidly.

Structure Forms:

- affirmative: Subject + to be + going to + base verb (e.g., She is going to learn Java.)
- Negative: Subject + to be + not + going to + base verb (e.g., We are not going to study matrices today.)
- Question: To be + subject + going to + base verb? (e.g., Are they going to debug the code?)

3. Present Continuous for the Future

Structure: Subject + am/is/are + verb-ing

Use: To express definite future arrangements.

Examples:

- Technical: We are submitting the report next week.
- General: I am attending a seminar tomorrow.

Structure Forms:

- affirmative: Subject + am/is/are + verb-ing (e.g., I am meeting my friend tomorrow.)
- Negative: Subject + am/is/are not + verb-ing (e.g., She isn't traveling to Paris next week.)
- Question: Am/Is/Are + subject + verb-ing? (e.g., Are they coming to the party?)

Time Markers: Tomorrow, next week, in 2030, soon, later, this afternoon, today, tonight, this weekend, next month.

Active and Passive Voice

1. What is Active Voice?

In the **Active Voice**, the subject performs the action.

Structure: Subject + Verb + Object

Example: The professor teaches the class. (The focus is on the doer.)

2. What is Passive Voice?

In the **Passive Voice**, the focus is on the receiver of the action.

Structure: Object + be (in correct tense) + Past Participle (+ by + Subject)

Example: The class is taught by the professor. Sometimes the doer is not mentioned:
The class is taught.

3. Why Use the Passive Voice?

In technical or scientific writing, the passive voice is preferred when the result or process is more important than the person doing the action.

Examples:

- The experiment was conducted in the lab.
- The data was analyzed using MATLAB.
- The report will be submitted tomorrow.

Active and Passive Voice Rules in Different Tenses

Tense	Active Voice	Passive Voice
Present Simple	Subject + V1+s/es + Object	Object + is/am/are + V3 + by + Subject
Present Continuous	Subject + is/am/are + V1+ing + Object	Object + is/am/are + being + V3 + by + Subject
Past Simple	Subject + V2 + Object	Object + was/were + V3 + by + Subject
Past Continuous	Subject + was/were + V1+ing + Object	Object + was/were + being + V3 + by + Subject
Future Simple	Subject + will + V1 + Object	Object + will be + V3 + by + Subject
Present Perfect	Subject + has/have + V3 + Object	Object + has/have been + V3 + by + Subject
Past Perfect	Subject + had + V3 + Object	Object + had been + V3 + by + Subject
Future Perfect	Subject + will have + V3 + Object	Object + will have been + V3 + by + Subject

Important Note

There is no Passive Voice form for:

- Present Perfect Continuous
- Past Perfect Continuous
- Future Perfect Continuous
- Future Continuous (The passive form of the Future Continuous(will be being + past participle) is theoretically possible, yet it is rarely used in modern English.)

Meaning of V1, V2, V3

- **V1** = Base form of the verb (infinitive without “to”) — e.g., *write, go, eat*.
- **V2** = Past Simple form of the verb — e.g., *wrote, went, ate*.
- **V3** = Past Participle form of the verb — e.g., *written, gone, eaten*.

Conditionals

Conditional sentences describe a cause-and-effect relationship between two actions.

Structure: If clause (condition) + Main clause (result)

Example: If it rains, we will stay home. → “If it rains” = condition, “we will stay home” = result.

1. Zero Conditional (Type 0)

Use: For facts, general truths, or scientific laws.

Structure: If + Present Simple, Present Simple

Examples:

- If you mix red and blue, you get purple.
- If water reaches 100°C, it boils.
- If you press this button, the machine starts.

2. First Conditional (Type 1)

Use: For real or possible future situations.

Structure: If + Present Simple, Will + Base Verb

Examples:

- If I finish my work, I will go to the cinema.
- If it rains tomorrow, we will cancel the trip.
- If the system fails, we will restart it.

3. Second Conditional (Type 2)

Use: For imaginary or unreal situations (not true or unlikely).

Structure: If + Past Simple, Would + Base Verb

Examples:

- If I had a car, I would drive to work.
- If I were rich, I would buy a big house.
- If it didn't rain, we would go out.
