Strings

سلسلة من الحروف

Strings

- **Strings** are used for storing **text/characters**. ex : "Hello World"
- A String in C is a **sequence of characters** terminated with a **null character '\0'**

Index	0	1	2	3	4	5
Variable	H	e	l	l	o	\0
Address	0x23451	0x23452	0x23453	0x23454	0x23455	0x23456

```
// C program to read string from user
#include<stdio.h>

int main()
{
    // declaring string
    char str[50];

    // reading string
    scanf("%s",str);

    // print string
    printf("%s",str);

    return 0;
}
```

```
void main()
{
    char str[100]={"ahmed"};
    int i, length = 0;

    for(i = 0; str[i] != '\0'; i++)
        length++;

    //print the length
    printf("Length = %d\n",length);
}
```

Length = 5
